

BIODIVERSITY - <http://www.google.com/search?hl=en&lr=&oi=defmore&q=define:biodiversity>

Refers to the variety and variability among living organisms and the ecological complexes in which they occur. Diversity can be defined as the number of different items and their relative frequencies. For biological diversity, these items are organized at many levels, ranging from complete ecosystems to the biochemical structures that are the molecular basis of heredity. Thus, the term encompasses different ecosystems, species, and genes. <http://www.epa.gov/waterscience/biocriteria/glossary.html>

BIOSPHERE—<HTTP://WWW.GOOGLE.COM/SEARCH?HL=EN&LR=&OI=DEFMORE&Q=DEFINE:BIOSPHERE>

The term "Biosphere" was coined by the Russian scientist Vladimir Vernadsky in 1929. It refers to the relatively thin vertical zone of air, soil, and water that extends from the deepest ocean floor up roughly 6 miles in to the atmosphere. The biosphere is often divided into distinct biomes that represent the interactions between groups of organisms forming a trophic pyramid and the environment or habitat in which they live. www.fws.gov/midwest/EcosystemConservation/glossary.html

EUGENICS—<http://www.google.com/search?hl=en&lr=&oi=defmore&q=define:Eugenics>

(from the Greek for "well born"): the early twentieth century policy which aimed to improve the quality of the population by preventing "unfit" people from reproducing and encouraging "fit" people to reproduce. Such ideas were popular in many countries, and were widely implemented in US, the Nordic countries, Germany and other states. The eugenic philosophy was discredited by association with Nazi abuses, and most US and UK geneticists have actively dissociated themselves from eugenics since 1945. www.antenataltesting.info/glossary.html

1. Human intelligence is largely hereditary.

2. Civilization depends totally upon innate intelligence. Without innate intelligence, civilization would never have been created. When intelligence declines, so does civilization.

3. The higher the level of civilization, the better off the population. Civilization is not an either-or proposition. Rather, it's a matter of degree, and each degree, up or down, affects the well-being of every citizen.

4. At the present time, we are evolving to become less intelligent with each new generation. Why is this happening? Simple: the least-intelligent people are having the most children.

5. Unless we halt or reverse this trend, our civilization will invariably decline. Any decline in civilization produces a commensurate increase in the collective "misery quotient."

HUMAN GENOME PROJECT—<http://www.google.com/search?hl=en&lr=&oi=defmore&q=define:Human+Genome+Project>

Collective name for several projects begun in 1986 by the Department of Energy (DOE) to create an ordered set of DNA segments from known chromosomal locations, develop new computational methods for analyzing genetic map and DNA sequence data, and develop new techniques and instruments for detecting and analyzing DNA. This DOE initiative is now known as the Human Genome Program. The joint national effort, led by DOE and NIH, is known as the Human Genome Project.

INVASIVE SPECIES—<http://www.google.com/search?hl=en&lr=&oi=defmore&q=define:Invasive+Species>

A species occurring as a result of human activities beyond its accepted normal distribution and which threatens valued environmental, agricultural or personal resources by the damage it causes

SUSTAINABLE DEVELOPMENT

<http://www.google.com/search?hl=en&lr=&oi=defmore&q=define:Sustainable+development>

Before the widespread use of the term sustainable industries, the terms sustainable economy and sustainable development were prevalent. Their popularization started with the United Nations Conference for Environment and Development (the Earth Summit) in 1992. The conference was prompted by the report Our Common Future (1987, World Commission on Environment and Development, also known as the Brundtland Commission), which called for strategies to strengthen efforts to promote sustainable and

World Heritage

<http://whc.unesco.org/>

Heritage is our legacy from the past, what we live with today, and what we pass on to future generations. Our cultural and natural heritage are both irreplaceable sources of life and inspiration. Places as unique and diverse as the wilds of East Africa's Serengeti, the Pyramids of Egypt, the Great Barrier Reef in Australia and the Baroque cathedrals of Latin America make up our world's heritage.

What makes the concept of World Heritage exceptional is its universal application. World Heritage sites belong to all the peoples of the world, irrespective of the territory on which they are located.

The United Nations Educational, Scientific and Cultural Organization (UNESCO) seeks to encourage the identification, protection and preservation of cultural and natural heritage around the world considered to be of outstanding value to humanity. This is embodied in an international treaty called the [Convention concerning the Protection of the World Cultural and Natural Heritage](#), adopted by UNESCO in 1972.

EMPOWERING THE UNELECTED AND UNACCOUNTABLE DECISION & POLICY MAKERS

**GLOBALIZATION OF MONETARY SYSTEM
(One World Monetary System – Like the Euro)**

**CONTROL OF NATIONAL AND INTERNATIONAL COMMERCE
(Manufacturing Controls & Regulations to Balance Trade—UN Taxation on All Goods & Services)**

**GLOBALIZATION OF ECONOMY
(Controlled Markets & Use of Selected Financial Institutions)
[World Bank/Federal Reserve/Suisse ·Deutsche/BNP Paribas]**

GLOBAL UN TAX ON GOODS, SERVICES AND MONETARY TRANSACTIONS

**CONTROL OF HUMAN POPULATIONS & ELIMINATION OF THE LEAST PRODUCTIVE
(Birth Control, Abortion, STDs, Sterilization, Euthanasia & Eugenics)**

**CLUSTERING OF PEOPLE INTO COMMUNITARIAN SETTLEMENTS
(Non-intrusive, Environmentally-friendly “Human Settlements”)**

**ENVIRONMENTALLY FRIENDLY JOBS & WORKPLACE
(Smoke Free—Thought Free Environment—Restrictive Diet Plans)**

**CONTROL OF MEDICINE AND QUALIFICATIONS TO RECEIVE MEDICINE—WHO
(Control of Prescriptions & Elimination of OTC, Holistic & Herb Medicines)**

**UN CONTROL OF MINERALS AND OTHER NATURAL RESOURCES
(UN Ownership of Mineral Rights & Forestry Products)**

RECIPROCAL SYMPTOMS OF AGENDA 21

CONTROL OF FOOD AND NUTRIENTS—CODEX & WHO
(Controls storage and distribution – Prescription for Vitamins)

CONTROL OF FOOD & CROPS
(Includes Farming, pesticides, herbicides and transportation)

GLOBALIZATION OF ENVIRONMENTAL CONTROLS
(Biospheres – Global Warming Agreements – Kyoto)

CONTROL OF WATER
(Ground & Surface water—Metered & Restrictive Use)

CONTROL OF SANITATION
(Ban of Outhouses and Private Septic Systems)

CONTROL OF TRANSPORTATION
(Global Warming & Air pollution – ORV/SUV footprints)

UN CONTROL OF LANDMARKS AND HISTORICAL SITES
(Preservation for Eco-tours)

UN DEVELOPMENT AND CONTROL OF BIOSPHERE RESERVES
